The Turkish Journal of Ophthalmology is an official journal of the Turkish Ophthalmological Association. On Behalf of the Turkish Ophthalmological Association Owner

Ziya KAPRAN
Private Practice, İstanbul, Türkiye
The Turkish Journal of Ophthalmology is the only scientific periodical publication of the Turkish Ophthalmological Association and has been published since January 1929. The Journal was first published in Turkish and French in an effort to bring Turkish ophthalmological research to the international scientific audience. Despite temporary interruptions in publication over the intervening decades due to various challenges, the Turkish Journal of Ophthalmology has been published continually from 1971 to the present.

The Journal currently publishes articles in Turkish and English after an independent, unbiased double-blind peer review process. Issues are published electronically six times a year, with occasional special issues.

The aim of the Turkish Journal of Ophthalmology is to publish original research articles of the highest scientific and clinical value at an international level. It also features review articles, case reports, editorial commentary, letters to the editor, educational contributions, and congress/meeting announcements.

The target audience of the Turkish Journal of Ophthalmology includes physicians working in the various areas of ophthalmology and all other health professionals interested in these issues.

The Turkish Journal of Ophthalmology is indexed in the PubMed/MEDLINE, PubMed Central (PMC), Web of Science-Emerging Sources Citation Index (ESCI), Scopus, TÜBİTAK/ULAKBİM, Directory of Open Access Journals (DOAJ), EBSCO Database, Gale, CINAHL, Proquest, Embase, British Library, Index Copernicus, J-Gate, IdealOnline, Türk Medline, Hinari, GOALI, ARDI, OARE, AGORA, and Turkish Citation Index.

Open Access Policy
This journal provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge.

Author(s) and copyright owner(s) grant access to all users for the articles published in the Turkish Journal of Ophthalmology as free of charge.

Open Access Policy is based on rules of Budapest Open Access Initiative (BOAI). By “open access” to [peer-reviewed research literature], we mean its free availability on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, crawl them for indexing, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than those inseparable from gaining access to the internet itself.

This work is licensed under a Creative Commons Attribution-NonCommercial-NoDerivatives 4.0 (CC BY-NC-ND) International License.

Copyright
Turkish Journal of Ophthalmology is an open access publication, and the journal’s publication model is based on Budapest Open Access Initiative (BOAI) declaration.

All published content is available online, free of charge at www.oftalmoloji.org.
INSTRUCTIONS TO AUTHORS

The Turkish Journal of Ophthalmology is the official periodical of the Turkish Ophthalmological Association and accepts manuscripts written in Turkish and English. Each issue is published electronically in both Turkish and English. Manuscripts submitted in Turkish should be consistent with the Turkish Dictionary and Writing Guide (‘Türkçe Sözlüğü ve Yazım Kilavuzu’) of the Turkish Language Association, and care should be taken to use the Turkish forms of words. The Turkish Journal of Ophthalmology charges no submission or manuscript processing fee.

Contributions submitted to the Journal must be original and not published elsewhere or under consideration for publication by another journal. Reviewed and accepted manuscripts are translated either from Turkish to English or from English to Turkish by the Journal through a professional translation service. Prior to publication, the translations are sent to the authors for approval or correction requests, to be returned within 3 days. If no response is received from the corresponding author within this period, the translation is checked and approved by the editorial board.

Turkish Journal of Ophthalmology is abbreviated as TJO, but should be denoted as Turk J Ophthalmol when referenced. In the international index and database, the journal is registered as Turkish Journal of Ophthalmology, abbreviated as Turk J Ophthalmol.

Scientific and ethical liability for a contribution remains with the author(s) and copyright is held by TJO. Authors are responsible for article contents and accuracy of the references. Manuscripts submitted for publication must be accompanied by the Copyright Transfer Form signed by all contributing authors. By submitting this form, the authors guarantee that the manuscript and the data therein are not previously published or being evaluated for publication elsewhere and declare their scientific contribution and liability.

All manuscripts submitted to TJO are screened for plagiarism using iTorrent. Results indicating plagiarism may result in manuscripts being returned or rejected.

Experimental, clinical and drug studies requiring approval by an ethics committee must be submitted to TJO with an ethics committee approval report confirming that the study was conducted in accordance with international agreements and the Helsinki Declaration (2013 revision) (https://www.wma.net/policies-post/wma-declaration-of-helsinki-ethical-principles-for-medical-research-involving-human-subjects/). Information regarding ethical approval and patient informed consent for the study should be indicated in the Materials and Methods section. For experimental animal studies, the authors should include a statement confirming that the study procedures were in accordance with the Care and Use of Laboratory Animals (http://oacu.od.nih.gov/regs/guide/guide.pdf) and that animal ethics committee approval was obtained.

If an article includes any direct or indirect commercial connections or if any institution provided material support for the research, authors must include a statement in the cover letter stating that they have no commercial relationship with the relevant product, drug, pharmaceutical company, etc. or specifying the nature of their relationship (consultant, other agreements).

All individuals and organizations from which the authors received any form of assistance and other support should be declared, and the Conflicts of Interest Form should be used to explain any conflicts of interest. All contributions are evaluated by the editor-in-chief, associate editors, and independent referees. The Turkish Journal of Ophthalmology uses an independent, unbiased, double-blind peer review process. Manuscripts are received and reviewed by the editor-in-chief, who directs them to the appropriate section editor. The section editor sends the manuscript to three independent referees. Referees are selected by the editorial board from among national and international experts in the area relevant to the study. The referees accept or reject the invitation to review the manuscript within two weeks. If they accept, they are expected to return their decision within 21 days. The associate editor reviews the referees’ decisions, adds their own feedback, and returns the manuscript to the editor-in-chief, who makes the final decision in case of disagreement among referees, the editor can assign a new referee. The editor-in-chief, associate editors, biostatistics consultant, and English language editor may make minor changes to accepted manuscripts before publication, provided they do not fundamentally change the text.

In case of a potential scientific error or suspicion/allegation of ethical infringement in research submitted for evaluation, the Journal reserves the right to submit the manuscript to the supporting institutions or other authorities for investigation. The Journal accepts the responsibility of properly following-up on the issue but does not undertake any responsibility for the actual investigation or any power of decision regarding errors.

The editorial policies and general guidelines for manuscript preparation specified below are based on the ‘Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals’ from the International Committee of Medical Journal Editors (ICMJE) (2013, archived at http://www.icmje.org/).

STROBE statement, a checklist of items that should be included in reports of observational studies (http://www.strobe-statement.org/);

STROBE statement, a checklist of items that should be included in reports of observational studies (http://www.strobe-statement.org/);

GENERAL GUIDELINES

All submissions to TJO are made electronically through the Journal Agent website (http://journalagent.com/tjo/). After creating an account, authors can use this system for the online submission and review process. Manuscripts collected in the system are archived according to the rules of the ICMJE, Index Medicus (Medline/PubMed) and Ulakbim-Turkish Medicine Index.

Format: Manuscripts should be prepared using Microsoft Word, size A4 with 2.5 cm margins on all sides, 12 pt Arial font, and 1.5 line spacing.

Abbreviations: Abbreviations should be defined at first mention and used consistently throughout the text thereafter. Internationally accepted abbreviations should be used; refer to scientific writing guides as necessary.

Cover letter: The cover letter should include the manuscript type, a statement confirming that the article is not under consideration for publication by another journal, declaration of all sources of funding and equipment (if applicable) and a conflict of interest statement. In addition, the authors should confirm that articles submitted in English have undergone language editing and that original research articles have been reviewed by a biostatistician.

REFERENCES

Authors are solely responsible for the accuracy of all references.

In-text citations: References should be indicated as a superscript immediately after the period/full stop of the relevant sentence. If the author(s) of a reference is/are indicated at the beginning of the sentence, this reference should be written in superscript immediately after the author’s name. Relevant research conducted in Turkey or by Turkish investigators should be cited when possible.

Citing presentations given at scientific meetings, unpublished manuscripts, theses, Internet addresses, and personal interviews or experiences should be avoided. If such references are used, they should be indicated in parentheses at the end of the relevant sentence in the text, without a reference number and written in full, in order to clarify their nature.

References section: References should be numbered consecutively in the order in which they are first mentioned in the text. All authors should be listed regardless of number. The titles of journals should be abbreviated according to the style used in the Index Medicus.

Reference Format

Journal: Last name(s) of the author(s) and initials, article title, publication title and its original abbreviation, publication date, volume, the inclusive page numbers.

Example:

Book: Last name(s) of the author(s) and initials, chapter title, book editors, book title, edition, place of publication, date of publication and inclusive page numbers of the extract cited.

FIGURES, TABLES, GRAPHICS, AND IMAGES
All visual materials together with their legends should be located on separate pages following the main text.

Images: Images (pictures) should be numbered and include a brief title. Permission to reproduce pictures that were published elsewhere must also be included. All pictures should be of the highest quality possible, in JPEG format, and at a minimum resolution of 300 dpi.

Tables, Graphics, Figures: All tables, graphics or figures should be enumerated according to their sequence within the text and a brief descriptive caption should be written. Any abbreviations used should be defined in the accompanying legend. Tables in particular should be explanatory and facilitate readers’ understanding of the manuscript, and should not repeat data presented in the main text.

BIOSTATISTICS
To ensure controllability of research findings, the study design, study sample, and methodological approaches and practices should be explained with appropriate sources referenced.

The "p" value defined as the limit of significance along with appropriate indicators of measurement error and uncertainty (confidence interval, etc.) should be specified. Statistical terms, abbreviations, and symbols used in the article should be described and the software used should be stated. Statistical terminology (random, significant, correlation, etc.) should not be used in non-statistical contexts.

The study results should be stated and the clinical applicability of the results should be defined.

Discussion: The study results should be discussed in terms of their favorable and unfavorable aspects and they should be compared with the literature. The conclusion of the study should be highlighted.

Case Reports
Case reports should present cases which are rarely seen, feature novelty in diagnosis and treatment, and contribute to our current knowledge. The first page should include the title in Turkish and English, an unstructured Turkish summary up to 150 words in length and a corresponding English abstract not exceeding 175 words, and keywords in both languages. The main text should include the introduction, case presentation, discussion, and references. The main text should not exceed 1500 words, excluding references. For case series of 3 or more, the main text should not exceed 2000 words, excluding references.

Review Articles
Review articles can address any aspect of clinical or basic ophthalmology and should be written in a format that describes, discusses, and analyzes the current state of knowledge or clinical use based on the latest evidence and offers perspectives for future research. Most review articles are invited, but uninvited review submissions are also welcome. Contacting the section editor is recommended before submitting a review.

Letters to the Editor
Letters to the Editor should be short commentaries related to current developments in ophthalmology and their scientific and social aspects, or may ask questions or offer further contributions in response to articles published in the Journal. Letters do not include a title or an abstract, should not exceed 500 words, and can have up to 5 references.

CORRESPONDENCE
All correspondence should be directed to the Journal’s secretariat:
